

TARCO®

LEAF COLLECTION BOX WITH FLEXIBLE CONNECTOR

DIMENSIONS: 76-3/4" Wide, 68-3/4" High, Lengths: 8 ft. - 16 ft.

CONSTRUCTION: The sides, front and rear door of the Leaf Box shall be of 10 gauge steel construction, adequately braced, electrically welded and having smooth interiors. (4) corner lift eyes.

REAR DOOR: Shall be full opening, hinged at the top by pins of not less than 3/4", a positive lock mechanism shall operate from the ground.

MOUNTING EQUIPMENT: Two forward mounted anchoring chains having a combined tensile strength rating of not less than 110,000 psi shall be provided to prevent the Leaf Box from sliding back when truck floor is elevated.

EXHAUST SCREENS: The exhaust screen sections shall be constructed of angle iron framed and externally removable without requiring access to the interior.

BAFFLE: An interior rubber baffle deflector shall be supplied to distribute the leaves in the box properly.

FLEXIBLE CONNECTOR: A self-sealing connection for the Leaf Box installation shall provide for vertical, horizontal, and longitudinal movement of the leaf loader discharge duct without the use of a hose. The flexible connection shall incorporate in its design a discharge tube rest for full support.

PAINT: Paint is electrostatically applied, color Yellow. Other colors available upon request.
